INTRODUCTION

June 28, 2018

The End of Life project is a compilation of resources intended to help persons and their families or guardians. We encourage the use of the many resources that are provided.

This information has been gathered and is provided with the generous assistance of people from the multiple New Mexico communities, DDSD Northwest Office, DDSD Metro Office, DDSD staff members and leadership. We could not have completed this project without their contributions.

Special thanks to Dr. Ronald Voorhees, DDSD Medical Director and Ingrid Nelson from the UNM Continuum of Care Project for their input and editing.

Please contact the UNM Continuum of Care Project at 505-925-2350 for specific trainings on End of Life topics.
